WORK EXPERIENCE

Helimp Softomation
(July, 2017 - Present)
Worked with Phalcon PHP and Angular as Backend Developer and Database Administrator.

PROJECTS

ERP - PCB Manufacturing
Built a ERP system on Phalcon PHP and AngularJS for the PCB manufaturing company while in Helimp Softomation.

toPDF
Simple HTML to PDF converter library for developers built on Phalcon.
github/toPdf

mCare
A Desktop app to get data from mysql(using Node.JS) and accessing it in Angular project wrapped with Electron.

Avasar - EMS
Avasar is an Online Event Management System made in last year of my college. The Idea is to make the user just seat back and book all the services like Place, Catering, DJ, Invitations etc. for their Event. The project made on ASP.Net/C# (Web). This Project was Temporarily hosted on AWS cloud.
